Allowable Subject Matter

1. Claims 1-6 allowed.

The primary reason for allowance of claims 1-3 is the inclusion of the limitation of an image density detecting means being connected to a support frame and being in proximity to a locking means of the support frame, which is in all of claims 1-3 but not disclosed nor suggested in any of the references cited.

The primary reason for allowance of claims 4-6 is the inclusion of the limitation of an image density detecting means being connected to a support frame and in proximity to a driving roller which is near a pivot of the support frame, which is in all of claims 4-6 but not disclosed nor suggested in any of the references cited.
